RESEARCH INTERESTS

Computational Geomechanics | Poromechanics | Reservoir Simulation | Scientific Machine Learning

EDUCATION

Ph.D. in Earth Science – Cornell University 2024 – Present
Minors: Computer Science and Scientific Computing
B.S. in Mining Engineering – Northeastern University (CN) 2024

RESEARCH EXPERIENCE

Ph.D. Student – Dept. of Earth and Atmospheric Sciences, Cornell University Aug. 2024 – Present
Advisor: Chloé Arson Ithaca, NY

Project: Computational geomechanics and poromechanics for coupled multiphysics problems in subsurface and reservoir systems, supported by physics-based and machine-learning surrogate modeling

- Develop coupled poromechanics and computational geomechanics models of subsurface and reservoir systems (hydraulic fracturing, geothermal injection–production) in the MOOSE finite element framework, capturing thermo-hydro-mechanical interactions in fractured rock.
- Study multiscale transport in porous subsurface media through homogenization theory, informing reservoir-scale surrogate modeling.
- Build physics-informed neural networks, implicit neural representations, and operator-learning surrogates that deliver geometry- and physics-aware predictions at a fraction of the cost of full finite element simulation, supporting engineering decision-making.
- Lead a cross-institution project on PDE-grounded verification of the physical correctness of LLM-generated multiphysics simulation code.
- **Ongoing:** AI-driven discovery of closed-form homogenization laws for permeability—combining data-driven methods with homogenization theory to learn interpretable closed-form expressions for upscaled permeability of heterogeneous porous media.

Undergraduate Researcher – Northeastern University (CN) Sep. 2020 – Jun. 2024
B.S. in Mining Engineering Shenyang, China

Thesis: A Unified Model for Microseismic Signal Classification and Arrival-Time Picking Based on Deep Learning

- Conducted research in mining geomechanics spanning hydraulic fracturing, triaxial rock testing, tunnel boring machines (TBMs), and AI-driven microseismic signal processing.
- Developed a unified deep-learning model for microseismic signal classification and arrival-time picking, replacing separate manual processing workflows.
- Performed laboratory rock mechanics testing and supported experimental and field data interpretation for hydraulic fracturing and TBM studies.
- Recognized with the Outstanding Thesis Award for thesis research and the National Scholarship (Ministry of Education) for overall academic performance.

RESEARCH SUPPORT AND COMPUTATIONAL ALLOCATIONS

Learned Uncertainty-Propagation and World Models for Enhanced Geothermal Reservoirs 2026
National Science Foundation (NSF), ACCESS program. Student lead: Y. Liu; Advisor: C. Arson. Total allocation and Arson group's share: 1.5M CPU hours.

AI-aided Computational Geomechanics 2026
Empire AI Alpha+Beta. PIs: Y.C. Han, Y. Liu, A. Tristani, and C. Arson. Total allocation and Arson group's share: 5.5K GPU hours.

A Physics-Guided Subsurface Earth-System Model for Uncertainty-Aware Prediction of Geothermal Reservoir Evolution 2026
NASA ROSES-25 F.5 FINESST. Under review. Future Investigator: Y. Liu; PI and faculty mentor: C. Arson.

CONFERENCES AND PRESENTATIONS

Oral presentation, 60th US Rock Mechanics/Geomechanics Symposium (ARMA) <i>American Rock Mechanics Association, Tucson, AZ, USA</i>	Jun. 2026
Invited talk, 20th Phase Field Methods Workshop <i>Center for Hierarchical Materials Design, Northwestern University, Evanston, IL, USA</i>	May 2026
Poster presentation, Cornell CEE Graduate Research Symposium <i>Cornell University, Ithaca, NY, USA</i>	Apr. 2026
Invited seminar: “Physics-Informed AI Optimization of Heterogeneous Rock Systems” <i>Southwest Petroleum University seminar series, Chengdu, China</i>	Dec. 2025
Poster presentation, 59th US Rock Mechanics/Geomechanics Symposium (ARMA) <i>American Rock Mechanics Association, Santa Fe, NM, USA</i>	Jun. 2025

FELLOWSHIPS AND AWARDS

Estwing Hammer Award – Most Outstanding EAS Graduate Student of 2024, Cornell University	2025
Cornell University Travel Grant , Cornell University	2025, 2026
Outstanding Thesis , Northeastern University	2024
National Scholarship , Ministry of Education, China	2024
First Class Scholarship , Northeastern University	2023
Autumn Scholarship , Northeastern University	2022
Golden Seed Scholarship , Northeastern University	2022

ACADEMIC SERVICE

- Reviewer, *Rock Mechanics and Rock Engineering*
- Reviewer, *Underground Space*
- Reviewer, *International Conference on Artificial Neural Networks*
- Reviewer, *Geothermal Rising Conference*

SKILLS

Programming & Scientific Computing: Python, C++, R, MOOSE finite element framework **Modeling & Simulation:** finite element modeling, coupled multiphysics simulation, poromechanics, computational geomechanics, CAD (e.g., AutoCAD, SolidWorks) **Subsurface & Reservoir:** hydraulic fracturing, geothermal injection–production modeling, multi-scale transport in porous media **Scientific Machine Learning:** ML for PDEs, physics-informed neural networks, operator learning, implicit neural representations (INRs), surrogate modeling for scientific computing **LLMs for Simulation:** using large language models to accelerate simulation-software workflows and to verify the physical correctness of generated simulation code **Experimental Methods:** rock mechanics testing (e.g., triaxial compression), laboratory instrumentation **Currently Learning:** phase-field modeling (fracture/multiphysics), multiphase flow in porous media **Scientific Writing:** L^AT_EX / Overleaf

PROFESSIONAL MEMBERSHIPS

- Member, American Rock Mechanics Association (ARMA), 2025–Present
- Member, International Society for Rock Mechanics and Rock Engineering (ISRM), 2025–Present
- Member, Chinese Society for Rock Mechanics and Engineering (CSRME), 2024–Present
- Member, Geothermal Rising, 2025–Present
